

LEVANTE

PANEL
HEATERS

Efficient heat, silent heat.

Levante panel heaters are robust, easy to use and ideal for student accommodation, rental properties and at home. They include a bracket for wall mounting and lockable castors for portability. A tough white powder coating matches any décor. Using natural convection, Levante heaters run noiselessly and, because there is no fan, they are allergy and asthma

friendly. All heaters are thermostatically controlled with the option to run at half power. All models feature Wi-Fi too, so they can be easily controlled from your smart phone.

Levante heaters come equipped with Open Window Detection, which detects sudden changes in temperature if a window is open and switches the heater off to save energy.
