anywAiR[®] Technology Wi-Fi Adaptor II

Smart Climate Control For Fujitsu Air Conditioners

Introducing Smart Climate Control

Control your air from anywhere with Fujitsu General's new **anywAiR® technology Wi-Fi adaptor II**. Personalise your comfort, save energy and enjoy intelligent climate control of your home.

Fujitsu General's anywAiR® technology Wi-Fi adaptor II plugs easily into a select range of compatible¹ Fujitsu General air conditioners including the wall mounted Lifestyle range indoor unit, enabling Wi-Fi control of the air conditioner. A discreet solution that allows you to control your air conditioner anywhere by smartphone or tablet using the myanywAiR® Next app. So, whether you're at the office or a soccer game, you can feel confident about coming back to a comfortable home.

Easy to install

Voice assistant-friendly

Energy management features

Intuitive mobile app

Online customer support

5 year warranty

Device Installation

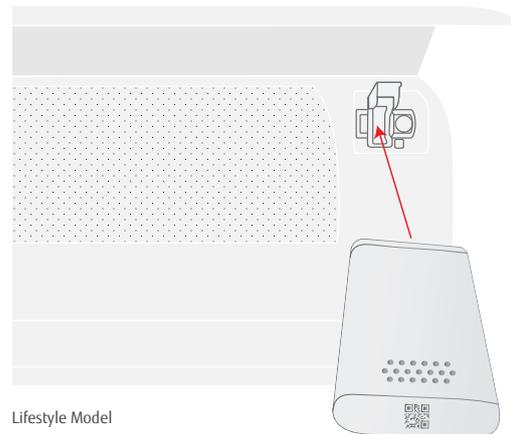

1 Download the myanywAiR® Next app from the app store.

2 Plug in the anywAiR® technology Wi-Fi adaptor II into your AC unit.

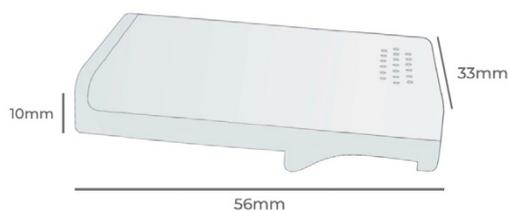

3 Follow the simple instructions displayed on the app.

Lifestyle Model

Dimensions

Smart Home Integration

Compatible with a range of Smart Home Voice Control Devices. Compatibility can be subject to changes made by these third-party companies.

¹ Compatible with Fujitsu General models that have a UART port. A licenced installer and an additional cable will be required for all installations in air conditioning units outside of the Lifestyle range.

myanywAiR[®] Next: Smart Climate Control

The myanywAiR[®] Next app revolutionises home climate control, allowing you to effortlessly adjust and optimise your air conditioner from anywhere.

Key Feature Controls

Mobile Control

Control your air conditioner from anywhere, anytime from your mobile, tablet or computer.

Timer

Set a specific time for your air conditioner to turn on or off, ensuring comfort and energy savings.

Schedule

Create personalised schedules for different days and times.

Climate React

Program rules so that your air conditioner turns on automatically once the room goes above or below certain temperatures.

Geofencing

Use geolocation to automatically turn your air conditioner on or off based on your proximity to home.

Filters

With Artificial Intelligence (AI) and based on your air conditioner usage, the app will remind you to clean your filters at certain intervals.

Share Device

Share smart control access to your air conditioner via the myanywAiR[®] Next app with as many friends and family as you like and add multiple units to your app.

Smart Automation

Trigger climate react with schedules and geofencing to ensure maximum comfort and energy savings.

Mode

Easily switch between Cool, Heat, Fan, Dry and Auto.

Fan Speed

Adjust the fan speed remotely.

Louvre Swing Action²

Control the horizontal and vertical swing action of your louvres.

² Louvre swing action available on selected products only. Refer to specific product brochures for further information or visit www.fujitsugeneral.com.au

myanywAiR[®] Next PLUS¹: Elevate Comfort and Control

Enhance comfort with myanywAiR[®] Next PLUS: offering advanced control, efficiency insights and smart home integration.

Key Feature Controls

Full Graphs

Examine weekly/monthly extended room temperature and humidity data along with user activity logs.

Weather and Pollution

Provides users with real-time air quality and weather data and air quality alerts. It enables users to make informed decisions about their air conditioner usage based on external conditions, contributing to a healthier and more comfortable living environment.

Auto-Off

Set a recurring failsafe timer that will deactivate your air conditioner no matter what, even if you forget to. E.g. Always turn air conditioner off after 5 hours of operation.

Coil Dry

Enable the moisture removal mode to run your air conditioner's fan after each cooling mode use to dry up any residual condensation, helping to limit mould growth.

User Management

Set temperature and settings restrictions for your guest users and save on energy.

Pure Boost

Activate the Pure Boost mode to use AI to analyse outdoor air quality and adjust air conditioning mode according to conditions².

Statistics

Daily, weekly, monthly and yearly data. Optimise your air conditioner usage, save energy and compare your usage to other users in your local area.

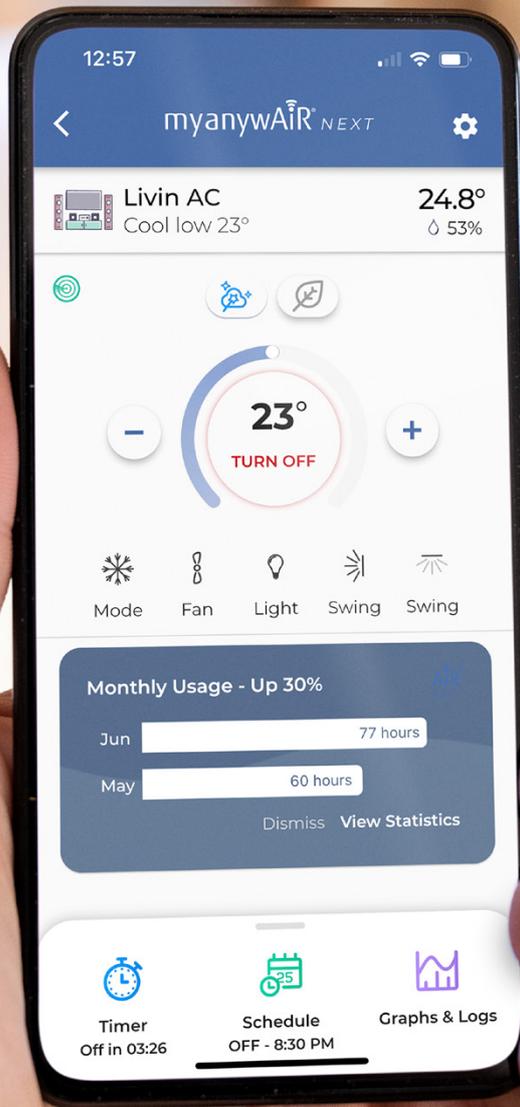

Optimus

Machine learning notifies you to anomalies like open windows and suggests energy saving optimisations.

¹ Subscribe to myanywAiR[®] Next PLUS app and gain access to exclusive advanced features, elevating your smart climate control experience.

² A supporting sensor is required to operate this mode indoors. Current feature monitors outdoor air quality.
