# NOIROT

## Welcome to the start of a warm relationship

Founded in Laon France, Noirot has been warming the hearts and homes of thousands of families for over 75 years. Noirot sits at the very forefront of heating innovation and technology.

The revolutionary **Monobloc heating element** is **totally silent** and the **non-expanding front panel** means **no rattles or creaks** whilst you're keeping warm.

Every Noirot panel heater is fitted with a precision thermostat that even after years of functioning maintains the desired temperature within 0.1 degree Celsius, which ultimately leads to reducing your heating costs.

It is this commitment to developing the latest technology and quality that allows us to bring to you our **Noirot Lifetime Replacement Warranty**. Comfort and peace of mind now means Noirot is for life.

Installing Noirot panel heaters is easy and the fittings are unobtrusive. A one piece bracket hidden behind the heater simply clicks in, making removal and cleaning easy. There is also the option of placing your heater on castors, so you can move your Noirot panel heater to wherever you need it the most.

Our extensive range comes in many sizes for all applications both domestically and commercially.

**Noirot, a warmth you can trust.**

**SENSITIVE  
CHOICE**

**APPROVED BY THE NATIONAL  
ASTHMA COUNCIL AUSTRALIA**

Noirot Panel heaters take advantage of the natural process of convection to make heating more efficient, effective and safe. With convection, the air naturally circulates over the Noirot designed Monobloc element to push warm air back into the room. Stopping nasty dust and dirt particles circulating in the air.

## Convection, not convention

The Noirot Spot Plus range takes advantage of the natural process of convection to make heating your home efficient, effective and totally silent.

The Noirot Precision Thermostat ensures that your room always maintains the desired temperature within 0.1 degree Celsius and prevents overheating and energy wastage.

## Wide range

Select from a wide range of Noirot models including non-timer, timer and Wi-Fi. Easy to use, all models feature a fully integrated thermostat, heat on indicator and a tip over switch for added protection.

\*Timer reflects timer models only

The Noirot range features a specially designed finned grill for the efficient and even distribution of heat

Warm air exits at the front of the unit and is directed into the room

Air rises over the internal Monobloc element as it is heated

The Noirot range features rounded edges for safety

As air cools it falls towards the floor and is drawn into the concealed inlet

## Heat that moves you

Our panel heaters feature easy glide castors so you can take the warmth with you wherever you go. Simply slide your Noirot heater from room to room, plug it in and it's ready to warm.

How easy is that?

Noirot Spot Plus Panel Heaters are all wall mountable and portable. A one piece bracket hidden behind the heater simply clicks in making removal and cleaning easy.

Or simply attach our easy glide castors to take your heater from room to room.

# Spot Plus heater

## Hits the spot every time

The Noirot Spot Plus heater is designed with pinpoint precision to heat specific areas, providing an extremely cost-effective option. With a completely silent operation, a sophisticated electronic thermostat and thermal safety cut-out, it's spot on for reliability, economy and comfort. The Noirot Spot Plus comes with a zinc, polyester coated body with the added safety of round edges, childproof settings and a specially designed finned grill for the efficient and even distribution of heat. Like all Noirot heaters the Spot Plus range embodies the elegance and sophistication of European design, along with state of the art technology and energy efficiency. The Noirot Spot Plus heater, spot the difference.

## Electric Panel Heater Running and Sizing Guidelines

The following information provides guidelines on sizing the correct heater for each individual requirement, in order to achieve the most efficient and economical running cost. On average you will require 100 watts per square metre.

MODEL	SIZE	APPROX RUN COST PER HOUR	ROOM SIZE	ROOM STYLE
7358-3 7358-3T 7358-3TPRO	1000W	15 Cents	10 m <sup>2</sup>	Single Bedrooms, Ensuites, Bathrooms & Studies
7358-5 7358-5T 7358-5TPRO	1500W	22.5 Cents	15 m <sup>2</sup>	Double bedrooms, Bathrooms & Home Office
7358-7 7358-7T 7358-7TPRO	2000W	30 Cents	20 m <sup>2</sup>	Larger Bedrooms, Living, & dining areas
7358-8 7358-8T 7358-8TPRO	2400W	36 Cents	24 m <sup>2</sup>	Larger living areas & Hallways

Running costs are based on a 50% economy rate and using a tariff of 30 cents per kW hour. For a more accurate operating cost please check your power bill supply charge. Please refer to [noirot.com.au](http://noirot.com.au) for more information.
